

# The Effect of Helmets on Player, Coach and Referee Perceptions in High School Girls' Lacrosse: A Survey Study

---

How does wearing helmets change how coaches feel about playing the game of lacrosse?

The University of Florida, Department of Orthopaedics and Rehabilitation, is studying the perceptions of coaches about game play and player attitudes with helmet use during lacrosse.

## What is involved?

An anonymous survey that takes 10-15 minutes to complete online.

## Who can complete the survey?

- Adults (18yrs +) who coach girls' high school or club team players

To participate, read the Consent Form and answer the questions on the survey at the following link:
